

**Dr Vikas Khanduja**

**UK**

Dr Vikas Khanduja is a Consultant Orthopaedic Surgeon specialising in hip and knee surgery and has a particular interest in arthroscopic surgery of the hip. His research interests centre around disease stratification of FAI using novel imaging techniques, better pre-operative planning tools using dynamic analysis and optimisation of arthroscopic management of FAI via precision surgery to improve outcomes. He has authored over 90 peer reviewed articles and two books. Dr. Khanduja is the recipient of the Arnott Medal presented by the Royal College of Surgeons of England in 2013. He is also the Associate Editor to the Bone and Joint Journal.
